

wayland::proxy\_t

```
graph BT; output_t[wayland::output_t] --> proxy_t[wayland::proxy_t];
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a gray rectangular box containing the text 'wayland::output\_t'. A blue arrow points vertically upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box contains the text 'wayland::proxy\_t'. This visualizes that 'wayland::output\_t' is a base class and 'wayland::proxy\_t' is a derived class.

wayland::output\_t
